FDP ON "GREEN HYDROGEN AND FUEL CELLS: UNLOCKING A CLEANER ENERGY PARADIGM" WAS CONDUCTED AT DEPARTMENT OF MECHANICAL ENGINEERING SIT PUNE !

It Kicked off with an insightful Inaugural Session by Dr. Ketan Kotecha and inspiring addresses by Mr. Atul Tare and Mr. Salim Huzefa.

Participants explored emerging hydrogen trends, green hydrogen production, and safety strategies with experts Chandrashekhar Chincholkar, Dr Sanjay Danao, Dr. OM PRAKASH SHARMA, and Dr. Chitra Rajagopal.

Particpants were energized by ground breaking discussions on hydrogen's future in mainstream applications and fuel cell technology by Dr Prakash Ghosh.

ALUMNI ACHIEVEMENT

Sanskriti Ude is thrilled to share that she has officially graduated with an MSc in Engineering Management from the University of Greenwich.

This is a Proud Moment for her and she tells that the journey to earning MSc has been truly transformative. She thanks all those around her for the incredible support and encouragement.

She also gives a heartfelt thanks to the Faculty of Engineering and Science, University of Greenwich for providing an outstanding environment for growth, and lecturers for their invaluable guidance throughout this journey.

This opens new opportunities and endless possibilities ahead for her!

FACULTY DEVELOPMENT PROGRAM

SIT- Symbiosis Institute of Technology, Pune in association with Symbiosis Teaching Learning Resource Centre (STLRC) invited for a Two-Day Faculty Development Program on:
"GREEN HYDROGEN AND FUEL CELLS: UNLOCKING A CLEANER ENERGY PARADIGM"

Academicians, industry professionals, and researchers passionate about sustainable energy solutions were attendees on 23rd to 24th January 2025 at Symbiosis Institute of Technology, Pune

The event was sponsored by Praj Industries , and supported by CMK ADVISORS LIMITED and La Fondation Dassault Systèmes

EXPERT SESSION

Department of Mechanical Engineering, at SIT is honored to host Dr. Mahantesh Hiremath, COEP alumnus and former ASME President, during his visit for an Expert Session. He conducted a session for Mechanical, Robotics & Automation, and Civil Engineering faculty, sharing his vast aerospace industry experience and career insights. Dr. Hiremath also discussed collaboration opportunities with ASME and Santa Clara University, along with strategies to establish an ASME student section at SIT Pune. His journey and ideas inspire us to aim for global excellence.

Thank you Dr. Ketan Kotecha Sir, Director SIT Pune, Dr. Nitin Khedkar Sir, DY Director Administration SIT Pune and Dr. Anirban Sur Sir, Head Mechanical Engineering SIT Pune for this opportunity to learn and connect!

M.TECH NEWS

The Future of Automotive is Electric – And the Future is Bright!

As the automotive industry pivots towards electric vehicles (EVs), the demand for skilled professionals with cutting-edge expertise has never been higher. A Master's in Automotive Technology can be a transformative step in your career, equipping you with the knowledge and skills to thrive in this evolving landscape.

Highlights of M.Tech in Automotive Technology from SIT Pune:

- Industry collaboration.
- IoT research lab,
- One semester (six months) at ARAI FID, Chakan, Pune
- Final two semesters focused on internship cum dissertation in the automotive industry
- Ranked 2nd among the top emerging private engineering colleges in the country.

STUDENT ACHIEVEMENT

Mazahir, final year mechanical student is happy to share that he has obtained a new certification: Siemens NX Mastery: Advance Design and Applications from Siemens and Coursera !!

The objective for doing this certification after completing his NX basics certification was to get a good understanding of the NX software, primarily to give an edge in his career.

He managed to get a 100% score by the end of the course. Through this course, he not only learned how to use the software, but also learned new skills such as convergence modelling.

Mechanical Engineering CAD CAM CAE Design NX Siemens UGNX
SIT MED Pune

Swaroop Rajpathak, student of third year Mechanical department is thrilled to announce that he has successfully completed the **MATLAB Onramp** training course! This comprehensive self-paced course has provided him with essential MATLAB skills, enhancing his ability to solve engineering problems and perform data analysis effectively.

As a CAD/CAM expert with experience in lattice structures, lightweight helmet design, and finite element analysis, this certification strengthens his technical toolkit and allows him to streamline simulations and optimize designs more efficiently.
He look forward to applying this knowledge to tackle complex challenges and contribute to innovative solutions in the engineering domain.

STUDENT ACHIEVEMENT

Department of mechanical engineering at SIT Pune is thrilled to share the fantastic news that Ananya Soni, student of second year has been selected for the prestigious Semester Exchange Program at Hamburg University of Technology (TUHH), Germany!

Hamburg University of Technology is renowned for its innovation and research-driven approach, and we are confident Ananya and Haris will make the most of this incredible opportunity to grow and excel.

We wish her the best for their journey ahead!

Student Prize at IIT- Hyderabad

Devarshi Bhawale, student of third year mechanical engineering department, are excited to announce that their team secured 2nd place at the National Level Design & FEA Competition organized by VSSC - Indian Space Research Organization, Thiruvananthapuram, as part of the 8th National Finite Element Developers Meet (NAFED08) held on February 1st, 2025, at Indian Institute of Technology Hyderabad.

Being among the top six teams selected nationwide for the final round, they had the incredible opportunity to present their structural and thermal analysis of a Mars Re-entry Module, competing

with some of the best minds in the field.

NAFED08 brought together experts from IITs, Indian Institute of Science (IISc), Indian Institute of Space Science and Technology, Industries, and R&D organizations, fostering knowledge exchange to

enhance PreWin and FEAST software capabilities.

They are honored to receive the award from Dr. S. Unnikrishnan Nair, Director, VSSC - Indian Space Research Organization and interact with esteemed ISRO delegates. They look forward to future collaborative opportunities in this exciting domain!

Also he presents huge shoutout to his incredible teammates Dhruv Sawant and Jyothiraditya Peri for

their dedication and teamwork! He is grateful for the opportunity and looking forward to more such

challenges.

:

Certified Six Sigma Green Belt!

Rachit Acharya, final year student at mechanical department, SIT, Pune is proud to announce that he is Certified Six Sigma Green Belt!

Completing the Six Sigma Green Belt Certification has been an incredible journey, equipping him with a deep understanding of data-driven problem-solving, process optimization, and quality improvement methodologies. Through this certification, he has gained expertise in:

- DMAIC Methodology – A structured approach to Define, Measure, Analyze, Improve, and Control processes to enhance efficiency.
- Root Cause Analysis – Identifying and eliminating process inefficiencies to drive continuous improvement.
- Statistical Process Control (SPC) – Using data and analytics to monitor and optimize performance.
- Failure Mode and Effects Analysis (FMEA) – Proactively identifying and mitigating risks to ensure process stability.
- Lean Principles – Eliminating waste, improving workflows, and enhancing overall productivity.
- Hypothesis Testing & Regression Analysis – Making data-backed decisions for operational excellence.

In the manufacturing sector, these competencies are crucial for enhancing product quality and operational efficiency. For instance, Six Sigma methodologies has been employed to reduce defects, streamline production processes, and improve supply chain management. Companies like General Motors, 3M, Dell Technologies, Boeing, Atos Group, and Honeywell have successfully implemented Six Sigma to achieve significant improvements in their operations.

A special thanks to Dr. Shruti Maheshwari Ma'am and Vikas Gulia Sir for encouraging me and instilling in him the importance of Six Sigma. Their guidance have been invaluable in shaping his journey!

This certification has transformed his perspective on efficiency, problem-solving, and continuous improvement. He is excited to apply these methodologies in real-world scenarios, drive impactful change, and contribute to business excellence.

:

New Academic Partnership!!!

An innovative Dual Degree Program with east Angelia was launched in the Department of Mechanical Engineering SIT Pune, offering students a truly global educational experience. Under this program, students will:

Spend the first two years at SIT- Symbiosis Institute of Technology, Pune

Complete the final two years at the University of East Anglia, UK

This initiative opens doors to:

- International exposure
- Cutting-edge research opportunities
- World-class academic and cultural experiences

This new step in global education wouldn't have been possible without the constant support and leadership of Dr. Ketan Kotecha Sir, Director of SIT Pune and International Cell SIT Pune.

The program will be available to students admitted for the academic batch 2025–2029.

2nd April , 2025

Grant Achievement!!!

Our 3rd-year Mechanical Engineering students have been awarded a ₹50,000 Student Research Grant by the Indian Society for Refrigeration and Air Conditioning Engineers (ISHRAE)!

This grant was secured through a prestigious national-level competition, showcasing their dedication, innovation, and technical excellence.

(Established under section 3 of the UGC Act, 1956)
Re-accredited by NAAC with 'A++' Grade | Awarded Category – I by UGC
Founder: Prof. Dr. S. B. Mujumdar, M. Sc., Ph. D. (Awarded Padma Bhushan and Padma Shri by President of India)

SIT/ADMIN/2025/362 Date: 20th February,2025

Congratulations, MR. DESAI JAYESH VIDYADHAR!

Your hard work and dedication have earned you the **Merit Scholarship for the Even Semester-April 2024** at **Symbiosis International (Deemed University)**. Achieving the **1st Rank** in **B.Tech Mechanical Engineering, 4th Semester (Academic Year 2024-2025)** is a remarkable milestone!

As a token of appreciation, you have been awarded a **20% Scholarship** on Semester Academic Fees.

We are incredibly proud of your achievement and wish you continued success in all your future endeavours!

Dr. Ketan Kotecha
Dean, Faculty of Engineering,
Symbiosis International (Deemed University), Pune

SIT

Jayesh Desai, student of third year, mechanical department, SIT, Pune is grateful to have been recognized at the Meritorious Students' Felicitation Ceremony at SIT- Symbiosis Institute of Technology for securing 1st Rank in the Department of Mechanical Engineering SIT Pune during the 4th Semester (AY 2024-2025).
The event was graced by the esteemed presence of Dr. Ketan Kotecha, Dean, Faculty of Engineering, SYMBIOSIS INTERNATIONAL UNIVERSITY & Director, SIT- Symbiosis Institute of Technology, along with Dr. Nitin Khedkar, Deputy Director Administration, and the Heads of Departments from all disciplines.

His gives heartfelt thank to Dr. Anirban Sur Sir, HoD - Mechanical Engineering, for his constant support and encouragement. He is immensely grateful to the Department of Mechanical Engineering SIT Pune for their invaluable guidance and opportunities that have shaped his journey.
He extends my sincere appreciation to SYMBIOSIS INTERNATIONAL UNIVERSITY and SIT- Symbiosis Institute of Technology for this recognition and the 20% Merit Scholarship on Semester Academic Fees, which serves as a great motivation to continue striving for excellence.
For him, this achievement is not just a personal milestone but a reflection of the unwavering support from mentors, faculty, and peers. Looking forward to more learning, growth, and contributions to the field of mechanical engineering!

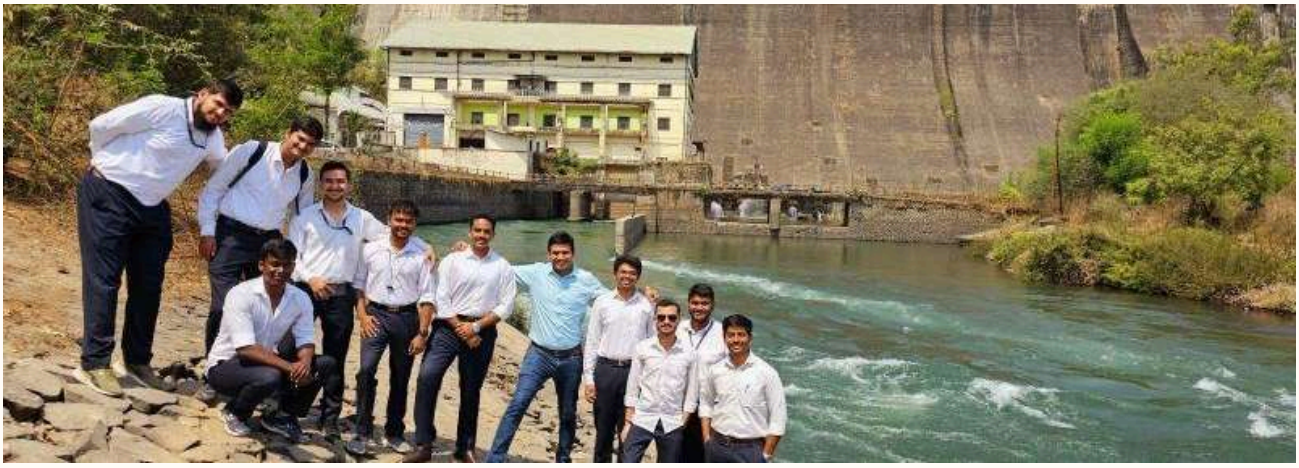

28th April , 2025

From Textbooks to Turbines – Witnessing Hydropower in Action!"

As part of our Fluid Machinery course, we had an incredible opportunity to visit the Bhatghar Hydro Power Station, where we observed the Vertical Kaplan Turbine in action and explored various power generation systems. This visit allowed us to connect theory with real-world applications, making learning truly immersive.

Some key insights from our visit:
Installed Capacity - 16,000 KW
Maximum Head for Power Generation - 45.05m
Type of Turbine - Vertical Kaplan (BHEL Hardwar)
Penstock Diameter & Length - 2018mm, 2267m
Annual Units Generation - 54.535 MUs

The power generated here is supplied to Shirwal MIDC, while the water released is utilized for irrigation via Veer Dam.

28th April , 2025

Tech-fest:

Department of Mechanical Engineering SIT Pune proudly hosted its annual Tech-fest, and what an incredible journey it's been!!
We welcomed students from various prestigious institutes, all coming together to celebrate technology, creativity, and the spirit of engineering. The event was a melting pot of ideas, energy, and innovation.

Don't miss the highlight reel — check out the attached video to experience the action, passion, and precision our future engineers brought to the fest!

A heartfelt thanks to all participants, faculty, coordinators, and collaborators who made this event a grand success.

Looking for Collaborators

Looking for Collaborators to Transform Rural Dairy with Our Eco-Friendly Smart Milk Chiller!

I'm thrilled to share our innovative solution designed to empower rural dairy farmers across India: an eco-friendly, solar-powered smart milk chiller with real-time milk quality monitoring.

Every year, thousands of liters of milk go to waste in rural areas due to inadequate cold storage and delayed quality testing. Our product directly addresses this challenge by combining:

Solar-powered cooling — reliable even in off-grid locations

Real-time quality monitoring — ensuring milk safety and reducing contamination risks

Smart alerts and data tracking — enabling proactive action for farmers and cooperatives

Energy-efficient, low-maintenance design — tailored for rural environments

We're actively seeking collaborators, partners, investors, NGOs, dairy cooperatives, and technology innovators to join us in scaling this solution and improving the livelihoods of smallholder dairy farmers.

If you're passionate about sustainable agriculture, clean energy, and inclusive innovation, let's connect! Together, we can build a more resilient, sustainable dairy value chain.

3rd May , 2025

Student Sport Achievement

Department of Mechanical Engineering SIT Pune congratulates Mr. Aditya Nambiar, A 3rd-year Mechanical Engineering student represented the SIT Team and secured first place in Men's Volleyball at 'Symbhav', organized by Symbiosis Law School, Vimanagar from April 2nd to 5th, 2025.

Congratulations on this outstanding achievement!

Student Placement

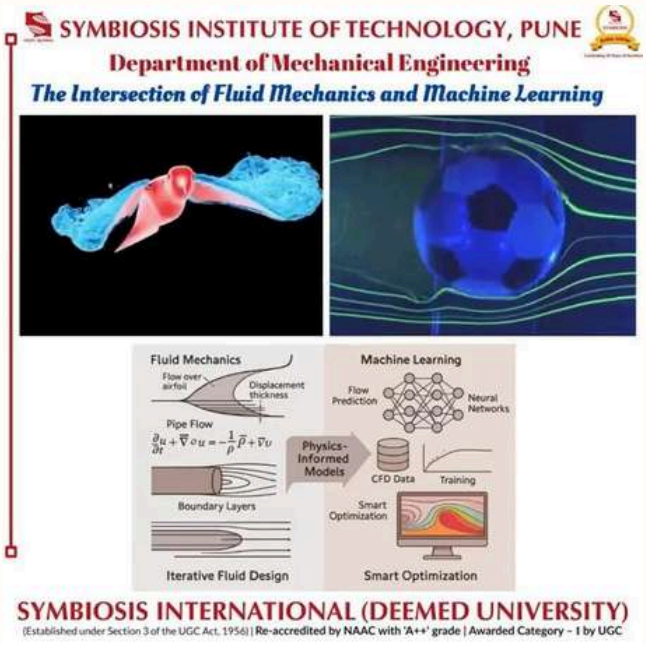

PLACEMENT!!
Congratulations to Harsh Tiwari (B.Tech Mechanical, 2021-25) for securing a Graduate Engineer Trainee position at Vanderlande (Toyota Automated Logistics Group) with a CTC of 6 LPA.
Wishing you great success in your journey with this global leader in automated logistics!

5th May , 2025

IBioinspired Engineering Smart Design Thinking Fluids
What happens when centuries-old physics meets cutting-edge intelligence?
Fluid Mechanics reimagined!!

From predicting turbulent flows with neural networks to designing energy-efficient systems using AI — we're no longer just solving equations, we're training models to think like fluid!
This fusion isn't just fascinating — it's transforming how we simulate, optimize, and innovate in aerospace, biomedical, automotive, and energy systems.
Imagine this:
1. An AI that evolves its understanding of boundary layers with each dataset.
2. A jet engine that predicts flow separation before it happens — and self-corrects.
3. A heart valve design inspired not just by anatomy, but by learning from flow patterns across species.
This isn't sci-fi. This is what happens when Machine Learning stops being a tool — and becomes a collaborator in classical engineering.
The fluid is still Newtonian.
But the thinking is not.

PBL Review 06-05-2025

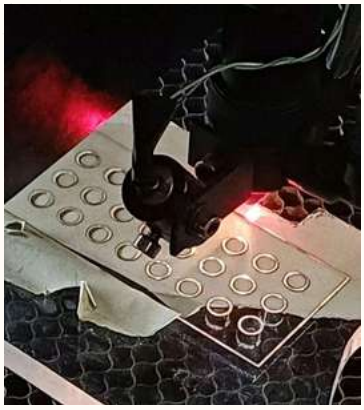

Third year mechanical students shared their Project Based Learning II experience. They conducted an experimental evaluation and optimization of acrylic hole quality during laser cutting, with a strong focus on enhancing precision, surface finish, and dimensional accuracy.

Key tasks included:

- Investigated the effects of laser power, cutting speed, and focal position on different acrylic thicknesses
- Analyzed and interpreted results using statistical methods
- Applied optimization techniques to achieve superior hole quality
- Compiled the findings into a research paper exploring advanced laser cutting strategies for polymer materials

They are grateful to have worked with my brilliant teammates:
Muffaddal Kantawala, Harmandeep Singh & Achyut Sharma and they share special gratitude to their project guide Prof.Vikas Gulia for the mentorship, guidance, and support throughout the project.

University of Michigan-Dearborn

Student upgrade certification

Mr. Jayesh Desai, final year students at mechanical engineering department, SIT Pune completed the "Python Using AI" workshop conducted by AI for Techies, and he states that it was a real mind-opener for anyone in the core engineering domain!

As a Mechanical Engineering student, he always believed that bridging traditional engineering with modern tech is the key to staying relevant—and this session confirmed it.

What made this workshop stand out?

It wasn't just about learning syntax or tools—it was about real, implementable hacks to boost productivity and solve engineering problems smarter.

Top Insights & Use Cases:

-Python + Excel Automation: Instantly clean and analyze production data from shop floors or QC sheets.

-AI-based Report Writing: Generate structured lab reports, design justifications, and simulation summaries faster than ever.

-CAD + Python Integration: Use Python scripts for batch processing CAD models or automating repetitive design tasks.

-Maintenance Logs to Insights: Apply AI tools on machine logs for predictive maintenance and anomaly detection.

-Simulation Optimization: Combine AI tools with FEA/CFD results to get design suggestions or visualize stress/thermal trends more intuitively.

-AI Assistants: Use ChatGPT-style tools for writing technical documentation, toolpath optimization summaries, or even process planning.

He is thankful to AI for Techies for curating such a future-ready session and helping us engineering students o unlock the power of automation and smart workflows.

He is looking forward to applying these tools in academic projects, internships, and eventually on the shop floor.

Mechanical Engineering -Python-Artificial Intelligence-Digital Manufacturing

Ms. Ananta Verma **Alumni 2019-23**

Alumni of Department of Mechanical Engineering has graduated with her Master's in Data Science from the University of the Pacific and she is so grateful.

She shares that "it's been such an incredible, emotional, and unforgettable journey. I still remember how anxious I was back in 2023, sitting outside the embassy, terrified about my visa interview. So many "what ifs" ran through my mind—what if I'm rejected, what if things don't go as planned? But the day I got approved, something shifted. It felt like the beginning of something truly special."

She expresses that In the last two years, she has learned more than ever imagined, about data science, about people, about resilience, about celebrating small wins and embracing challenges. She has received appreciation for projects, the kind words from professors, and the love and support from friends and family, which made her go far.

She gives special thanks to professor James Hetrick , and professor Anahita Zarei for their support and encouragement throughout the course.

Alumni Talk

Department of Mechanical Engineering SIT Pune had a wonderful session with our proud alumnus Ms. Sneh Sonam (Batch 2017–2021), who is now working as an Assistant Manager at Deloitte, Pune.

In her talk titled "From Campus to Career: My Journey Through Mechanical Engineering", Sneh shared how she moved from being a Mechanical Engineering student to working in the fields of Data Analytics and Management. She also spoke about her earlier role at Cummins as a Data Analyst.

Her story really inspired our first-year students. She explained how a Mechanical background can help in learning new skills like coding, AI, and data science. She also explained the importance of Mechanical Engineering in today's world. She said that mechanical knowledge builds strong problem-solving skills and logical thinking.

Department gives a big thank you to Ms. Sneh Sonam for giving her time and sharing her journey with us. It was truly motivating!

They will receive a monthly stipend of ₹10,000–₹15,000, followed by a confirmed placement offer with a CTC of ₹6 LPA!

Kudos to these future innovators for stepping into the core of engineering excellence!

SIT- Symbiosis Institute of Technology

Mechanical Engineering Students' Association [MESA]

Riddhi Mahajan , third year student of Mechanical Engineering at SIT, Pune is excited to share that she has completed the 'Finite Element Analysis: Convergence and Mesh Independence Study' project-based course on Coursera!

This project-based learning experience, expertly guided by Jousef Murad, focused on one of the most essential aspects of simulation engineering — performing mesh refinement and convergence studies to ensure accuracy, reliability, and efficiency in FEA results.

Key Learnings from the Course:

- Understanding the need for mesh refinement and mesh convergence
- Performing sanity checks with first-order elements for fast results
- Deciding when and how to use second-order elements for higher accuracy
- Recognizing misleading results caused by overly coarse or excessively fine meshes
- Striking the right balance between computational cost and solution precision
- Learning industry practices for mesh independence validation

This course marks another step in her journey to mastering simulation-driven design. Onwards and upwards!

She gives special thanks to Jousef Murad for this clear, practical, and well-structured course!

Master of Science in Mechanical Engineering
Alumni department of mechanical engineering at SIT, Pune is excited to share that after countless hours in library working on projects, late-night study sessions, and more coffee than he would like to admit, he has officially earned his Master's degree in Mechanical Engineering from Arizona State University!!!
This degree wasn't just earned, it was built piece by piece, like any good engineering project. Through challenges, prototypes (and re-prototypes), and learning curves, he has grown into someone ready to take on real-world problems with confidence and curiosity.
He further shared that none of this would have been possible without his biggest cheerleaders: Mom, Dad, and sister. He thanks them for endless love, encouragement, and for always reminding him of what he is capable of.
He also thanks to the mentors, classmates, and friends who made this journey unforgettable.

Master of Science in Mechanical Engineering

Mechanical Engineering Induction Program 2025

The Department of Mechanical Engineering, Symbiosis Institute of Technology, Pune, was thrilled to welcome the incoming batch of B.Tech Mechanical Engineering students (2025–2029)!

Student Immersion Program

Department of Mechanical Engineering wishes final year student Devarshi Bhawale for the Singapore Experience Program, organized by the Singapore India Partnership Foundation (SIPF), a fully funded, prestigious 10-day student immersion program held from July 6th to 16th, 2025, inSingapore.

A group of 12 students from Symbiosis International University (Pune), Vishwakarma University (Pune), and Kumaraguru College of Technology (Coimbatore) has been selected to participate.
The program offered exposure to Singapore's education system, economy, governance, innovation ecosystem, and multicultural society through academic visits, cultural experiences, and institutional interactions.

Advanced Simulation and Engineering Tools-ANSYS Competition

The Department of Mechanical Engineering, Symbiosis Institute of Technology, Pune, in collaboration with ANSYS and ARK, is proud to host ANSYS Tech Day followed by a Student Competition.
This event got together students, faculty, and industry experts to explore the latest in engineering simulation, foster innovation, and provide a platform for young minds to showcase their talent.
Venue: Symbiosis Institute of Technology, Pune CAD Lab 1st floor
Date: 18th August 2025

ANSYS Workshop

Mechanical Engineering Department, SIT Pune, in collaboration with ANSYS and ARK, successfully conducted an engaging ANSYS Workshop. The event began with a full house of enthusiastic participants, showcasing the keen interest of our students in advanced simulation and engineering tools.
Highlights of the workshop:
1.Hands-on learning sessions with ANSYS experts.
2.Exciting competitions with prizes for the winners.
3.Active participation and interaction throughout the event.
4.Certificates of Participation for all attendees.

A big thank to our collaborators ANSYS and ARK for their support in making this event impactful, and to our students for their energy and curiosity that made the workshop a grand success!

SUPRA SAE-INDIA Competition

WWR team from Symbiosis Institute of Technology, Pune has successfully participated in the SUPRA SAEINDIA competition held at the iconic Buddh International Circuit, Noida.
The event brought together some of the brightest engineering minds from across the country, showcasing innovation, teamwork, and a true passion for motorsports. Our students demonstrated remarkable dedication, technical expertise, and gained invaluable hands-on exposure to real-world automotive challenges.
Congratulations to the entire WWR team, mentors, and faculty for their relentless hard work and commitment. This milestone marks another step forward in nurturing future-ready engineers and leaders in mobility innovation.

Building a new student ASHRAE Chapter

The department of mechanical engineering has successfully installed the ASHRAE Student Chapter at Cummins College of Engineering, Pune, in capacity as Student Activities Chair—ASHRAE Pune Chapter.
The event was not just about building a new student chapter year but also about igniting curiosity and creating opportunities for young minds to connect with the dynamic world of HVAC&R.

An engaging Tech Talk on AI Applications in HVAC by Rohit Chavan and Ms. Sairendri, who shared valuable insights on how artificial intelligence is reshaping the future of building systems and sustainable practices.
They thank to Dr. Parag Chaware and Prof. Rujuta Agavekar for hosting us and to Akshay Pahade and Tejesh Bagul, PE, CEng for the continued support in nurturing the next generation of engineers.

Hands-on learning

Mechanical Engineering students (Batch 2023–2027) recently had the opportunity to operate an Autonomous Mobile Robot (AMR) at the BEST Centre, as part of the Industrial Automation and Robotics Lab course.

This practical exposure bridges the gap between classroom concepts and real-world applications, helping students understand:

·Autonomous navigation & path planning

·Industrial automation integration

·Robotics applications in smart manufacturing

At SIT, we believe in preparing our students not just with theoretical knowledge, but with skills that empower them for Industry 4.0 and beyond.

Faculty Development Program

Department of Mechanical Engineering is proud to announce the successful completion of two-day Faculty Development Program on "Sustainability in HEIs – Driving Local Change", jointly hosted with Dr. Mugdha Kshirsagar and Dr. Prakash Rao, Ph.D- Head Symbiosis Centre for Climate Change and Sustainability.

With 20 passionate participants from across SYMBIOSIS INTERNATIONAL UNIVERSITY, the FDP sparked powerful conversations on geopolitics, Mission LiFE, carbon literacy, sustainable campuses, green mobility, plastic and e-waste management—all anchored in the vision of making higher education a true driver of climate action.

A heartfelt thank to leaders Dr. Ketan Kotecha, Director SIT, and Dr. Sophia Gaikwad, Head STLRC, Dr. Deepali Vora for their constant encouragement and guidance.

They deeply value the collaboration with industry partner Grattitude Synergy LLP , led by Akshay Pahade along with Superna S Verma, for bringing in real-world insights and energy that enriched the program.
They further thanks to all the speakers DIPEN PAUL, Avinash Kumar, Jaideep Gokhale and Shwetambari Shetye for kindling the light of sustainability.

MESA Team glimpse

From sparks to motion, From ideas to creation, MESA begins, with a revamped dedication is live again.
Students at Mechanical Department are excited to share a glimpse of team as they reopen the Mechanical Engineering Students' Association (MESA) with fresh energy and innovative ideas!
Their recent photoshoot marked the beginning of this incredible journey. It's an honour to have the presence of esteemed HoD, Dr. Anirban Sur Sir, the Faculty In-charge, Dr. Shruti Maheshwari, and Dr. Ashok Yadav, for the photoshoot of new and enthusiastic committee. The club is all geared up to shine as a reflection of their support and the collective zeal of students, creating an impact that extends beyond the classroom.
They are eager to share the exciting plans in store that will fuel engineering aspirations.

SymbiTech-CADClash

Reflecting on a Successful CAD Clash event in SymbITech 2025

And just like that, SymbiTech 2025 has come to a close! We are absolutely thrilled with the incredible success of this two-day event. The MESA Club proudly received nearly 65+ registrations, and the passion and engagement of the participants truly made this a memorable experience for everyone.

This event would not have been possible without the hard work and dedication of the team.

We want to extend our heartfelt thanks to

- Dr. Anirban Sur HoD, for giving us the opportunity to hold this event
- Dr Shruti Maheshwari, our Faculty In-Charge, for her invaluable guidance and unwavering support.
- Aditya Dhere, our President, and Vice President, Lalit Aditya Suresh Kumar, for their leadership in steering this event to success.
- Arya G Nair, Sr. Coordinator, for bringing this fantastic idea to life. Her vision was the starting point for it all.
- Technical Executives, Paras Borade and Amogh Narkar, for crafting such exciting and tricky questions that kept everyone on their toes.
- Social Media Head, Yash Chourasia, for the brilliant posters, announcements, and a strong social media presence.
- Digital media team member, Avvani Pawar, for her efforts in capturing the moments and helping with the posters.
- Financial Head of the team, ADITYA SHETE, for helping out with finance and fostering an engaging environment.
- Finally, a massive thank you to all the participants who joined us. Your curiosity and energy truly made CAD Clash a great success. We eagerly anticipate your contributions and participation in the upcoming events!

SymbiTech- Static Motor Test

Reflecting on a Historic Milestone at SymbiTech '25

And just like that, SymbiTech 2025 has marked a defining moment for aerospace innovation at Symbiosis Institute of Technology! We are absolutely thrilled to celebrate the official launch of ASTRA — Alliance for Symbiosis Trajectory Rocketry and Aerospace, the institute's rocketry and aerospace club.

What an incredible beginning! The team successfully conducted a static rocket motor test, a thrilling milestone that brings us one step closer to building and launching full-scale rockets. The passion, dedication, and technical excellence of the team made this achievement truly memorable.

This milestone would not have been possible without the hard work, coordination, and leadership within the team.

We want to extend our heartfelt thanks to:

- Dr. Anirban Sur, HoD Mechanical Department, for giving us the opportunity and believing in our vision
- Dr. Anindita Roy, Faculty Coordinator, for her invaluable guidance and unwavering mentorship
- Prof. Vikas Gulia and Dr. Shruti Maheshwari, for their constant support and encouragement throughout the process
- Maitreyi Rawat, Head of ASTRA and Head of Aerostructures, for leading the club and ensuring structural integrity and design precision
- Aayush Shete, Head of Propulsion, for driving the successful execution of the static motor test
- All subsystem heads, who worked side by side in perfect coordination to make this achievement possible
- Devarshi Bhawle and Sairaj Pisal, student mentors, for their significant guidance and technical contributions

Finally, a massive thank you to every team members whose dedication transformed classroom knowledge into real-world engineering excellence. This achievement reflects the power of teamwork, leadership, and shared ambition.

This is only the beginning. With every step forward, ASTRA is committed to exploring advanced propulsion systems, achieving larger-scale launches, and setting new benchmarks for student-driven rocketry in India.

The journey has just begun — and we are only going higher, faster, and farther from here.

Hands-on experience

Transforming Mechanical Engineering with Automation, Robotics, and Smart Manufacturing!
At the BEST Center, our mechanical engineering students are gaining hands-on experience that bridges traditional engineering with Industry 4.0 technologies. From designing intelligent systems to programming robotic arms and exploring smart manufacturing solutions, students are learning how automation is revolutionizing modern industry.

31st October 2025

A Major Milestone for SIT Mechanical Engineering!

We are delighted to announce that the Department of Mechanical Engineering, Symbiosis Institute of Technology (SIT), Pune, has signed a Memorandum of Understanding (MoU) with SAE India on October 30, 2025.
This partnership marks a new chapter in our ongoing mission to bridge the gap between academia and industry. Together, we aim to create a vibrant learning ecosystem that fosters innovation, hands-on experience, and industry-relevant research.
Adding to this momentum, we are proud to share that SAE India's Off-Highway Technical Conference 2025 (OffTeCON2025) will be hosted at SIT, Pune, on November 6th and 7th. The Title Partner for this prestigious event is John Deere.
Looking forward to an exciting journey of collaboration, innovation, and excellence!

Global Immersion Program (AY 2025–26)

The Department of Mechanical Engineering, Symbiosis Institute Of Technology Pune, proudly congratulates our second-year students selected for the Global Immersion Program for the upcoming academic year.
These students will be representing SIT Pune at esteemed international universities, reflecting the institute's commitment to global academic exposure and holistic learning:
Mr. Aditya Dhere – TUHH, Germany
Mr. Lalit Aditya Suresh Kumar – TUHH, Germany
Ms. Annika Alphina – THI, Germany
Ms. Avvani Pawar – KU Leuven, Belgium

This achievement exemplifies SIT's vision of nurturing globally competent engineers through experiential and interdisciplinary education.
We extend our best wishes to the students for a successful and enriching academic experience abroad.

Singapore Experience Programme 2025

Devarshi Bhawale a Mechanical Engineering Student at SIT Pune | R&D Intern @Bharat Forge Ltd.
Honoured to be felicitated for his participation in the Singapore Experience Programme 2025!
It was a privilege to be recognized during the Reflection Session and Reunion of the Singapore Experience Programme Student Group held recently at Jet Synthesys

This year marked the inaugural edition of the Singapore Experience Programme, a pioneering initiative by Singapore India Partnership Foundation (SIPF) India that brought together selected students from across India for a 10-day global immersion in Singapore.

The felicitation was done by Mr. Rajan Navani, CEO & Founder, Jet Synthesys and Board Member, SIPF India, along with Ms. Kiran Pasricha, Board Member, SIPF India, and Mr. Bharat Agarwal, President, Vishwakarma University - VU.

Grateful to Ms. Manasi Joshi, Head, (International Collaborations) SCIE, and Dr. Anindita Roy, Head, Internationalization Cell - SIT, for their recommendation, guidance, and constant support throughout this journey.

The Singapore Experience Programme has truly been a milestone, blending global exposure, learning, and collaboration that continues to inspire new perspectives every day.

What an incredible journey! Anshumaan Soni proud to share that His team, Wrench Wielders Racing, successfully completed the static and technical inspections at SUPRA SAEINDIA Student Formula 2025.

Getting their car to the Buddh International Circuit—the same track where F1 history was made—was a monumental achievement and a testament to the dedication of every team member.

His **Role** & **Technical Challenge**:
he had the privilege of serving in the Electricals Department, focusing on the vehicle's electronics and wiring harness. their primary technical hurdle involved adapting the stock KTM RC390 engine and its wiring harness—a system designed for a bike—into a four-wheel Formula vehicle.

This challenge demanded rigorous problem-solving to ensure optimal performance and safety, particularly concerning the integration of critical sensors and ECU tuning. A massive thank you to his seniors for successfully navigating this complex integration.

While they successfully passed crucial stages, we ultimately had to withdraw from the dynamic events due to safety concerns. This decision, though difficult, reinforced the paramount importance of engineering integrity and safety standards—a key professional takeaway from the competition.

Looking Ahead to SUPRA 2026:
As the newly appointed Co-Head of the Electricals Department, he has focused on scaling our capabilities. Our objective is to move beyond stock components and independently design and manufacture our own custom ECU, wiring harness, and touchscreen dashboard for the next engine platform.

The learning curve has been immense. Ready for the next phase of innovation!

A truly enriching cross-cultural experience!

It was a wonderful opportunity to be part of the Japan-Study India Program with students from Chiba University, Japan (13 September to 21 September 2025).
During the first week, we presented on Indian food and festivals, and in the following week, we actively supported our Japanese buddies in preparing their presentations on India.

Beyond the classroom, we helped them explore Pune—Visiting malls, guiding them with shopping, and giving them a glimpse of local culture and student life. We also played traditional Indian games and interacted with them in Japanese, which made our conversations smoother, more fun, and culturally meaningful.

I'm incredibly grateful to Chitra Shahane ma'am, who guided us throughout and ensured smooth coordination by appointing group leaders. This strengthened my teamwork, leadership, and cross-cultural communication skills. This exchange wasn't just about sharing knowledge, it was about building genuine connections, creating memories, and understanding each other's cultures more deeply.

A heartfelt thank you to Manasi Joshi ma'am, Bhakti Padhye ma'am, Asavari Tamhane ma'am, and Chitra Sahane ma'am for supporting us at every step.
Proud to have been part of a program where students from Symbiosis Institute of Foreign & Indian Languages (SIFIL) collaborated as buddies, interacted with the Japanese students, helped them craft their presentations, and ensured they enjoyed their time experiencing India in every way.

Looking forward to more global learning opportunities ahead!

Learning Through Machine Learning Application

Industrial Automation & Robotics Lab SIT Mechanical Engineering students have successfully applied and compared the efficacy of multiple Machine Learning models in MATLAB for a Pneumatic Double Acting Cylinder Automation System as part of their Industrial Automation and Robotics Lab course.

This hands-on project helped students bridge the gap between automation, data-driven decision-making, and intelligent control systems, giving them practical exposure to emerging industry demands.

A special appreciation to Dr. Ravi Shekhar, whose initiative, guidance, and continuous efforts made this implementation possible. His dedication to bringing advanced, application-oriented learning into the classroom is truly commendable.Empowering students with real-world skills

Integrating ML with industrial automation, Driving innovation in engineering education

Dr. Ravi Sekhar

Symbiosis Institute Of Technology, Pune

Launchpad Program 2025

Honoured to Speak at ARAI Academy, Chakan Campus Launchpad Program 2025. The initiative is an excellent platform aimed at strengthening student capabilities through structured skill development, simulation-based learning, and continuous professional growth.

Student Success- Internship Opportunity

We are really happy to share some great news from Department of Mechanical Engineering SIT Pune today. Two of our students have been selected for a 1-year internship at IAC, Chakan Plant under the BOAT program:

Omkar Narawade – M.tech Automotive Technology

Khushal Garg – M.tech Automotive Technology

They will receive a monthly stipend of ₹17,000, along with company bus facilities and a subsidized canteen. More importantly, they will gain hands-on industry experience that truly shapes careers.

Seeing our students step into the industry with confidence is one of the most rewarding parts of this profession. Their hard work, consistency, and willingness to learn have brought them here, and I'm sure they will make the most of this opportunity.

Wishing both Omkar and Khushal all the very best for this new journey.

May this be the start of something big for them — and an inspiration for many more students in the department.

Here's to more learning, growth, and success ahead. 🙌

Student Success- Internship Opportunity

We are very happy to share that our students Aditya Patel and Revant Parashar have been selected by Mitsubishi Electric India Pvt. Ltd. for a one-month paid internship.

This is a wonderful opportunity for them to gain real industry exposure, work on meaningful projects, and grow professionally. We have also received the official communication from the company, and the required confirmation from the institute is being taken care by Head Department of Mechanical Engineering SIT Pune Dr. Anirban Sur.

It's always a great feeling to see our students getting recognized for their hard work and capabilities. Moments like these strengthen our belief that consistent effort, curiosity, and the right guidance truly open doors.

Wishing Aditya and Revant an amazing learning journey ahead at Mitsubishi Electric.

Student Success- Internship Opportunity
Department of Mechanical Engineering SIT Pune delighted to share that Praveen S, a dedicated student of M.Tech – Automotive Technology, has secured a prestigious internship with Stellantis Engineering India Pvt. Ltd.

Praveen will be working in the Propulsion Systems Department from December 2025 to May 2026, and this opportunity comes with a paid stipend of ₹25,000 per month. This is a truly valuable industry exposure with one of the world's leading automotive groups.

This internship not only reflects Praveen's hard work and technical competence but also highlights the strength of our program in preparing students for real-world automotive engineering challenges.
We are proud to see him step into a role where he will gain hands-on experience with advanced propulsion technologies and work in a professional R&D environment.

Wishing Praveen a fantastic learning journey ahead — make the most of this opportunity and continue to rise!

Convocation 2025
SATURDAY 20 DECMEBER 2026 marked a proud and emotional milestone as we celebrated the Convocation Ceremony of the Batch 2021–2025 at Symbiosis Institute of Technology Pune.
Four years of perseverance, late nights, projects, failures, learning, and growth culminated in this single moment of achievement.

This moment of pride stands on the strong foundation laid by the Honourable Dr. S. B. Mujumdar, Sir, Founder and Chancellor of Symbiosis, whose visionary leadership has transformed Symbiosis into a globally respected institution rooted in internationalism, excellence, and social responsibility. His ideals continue to guide every convocation, every classroom, and every graduate.

We were deeply honoured to have Dr. S. Jaishankar, Hon'ble Minister of External Affairs, Government of India, as the Chief Guest. His address inspired our young engineers to think beyond boundaries, embrace responsibility, and contribute meaningfully to the nation and the world.

To the Batch of 2021–25:
You leave the campus not just with degrees, but with values, friendships, and the ability to adapt and innovate in a rapidly changing world. As you step into industry, research, entrepreneurship, or higher studies, carry forward the spirit of curiosity, integrity, and lifelong learning.

Wishing all our graduates immense success and purpose in the journey ahead.

SYMBIOSIS INTERNATIONAL UNIVERSITY
Once a Symbiosis student—always a Symbiosis ambassador.
Convocation2025

Placement-Internship at Aerosys HVAC
We are pleased to share that three students from the 2022–2026 batch have been selected for a 6-month paid internship at Aerosys HVAC:

- ADITI PATIL
- SAKSHI KADUSKAR
- SWAROOP RAJPATHAK

Internship highlights:

- Stipend of ₹8,000 per month
- Hands-on exposure to the HVAC industry
- PPO opportunity of ₹3.5–4 LPA, subject to performance appraisal after 3 months.

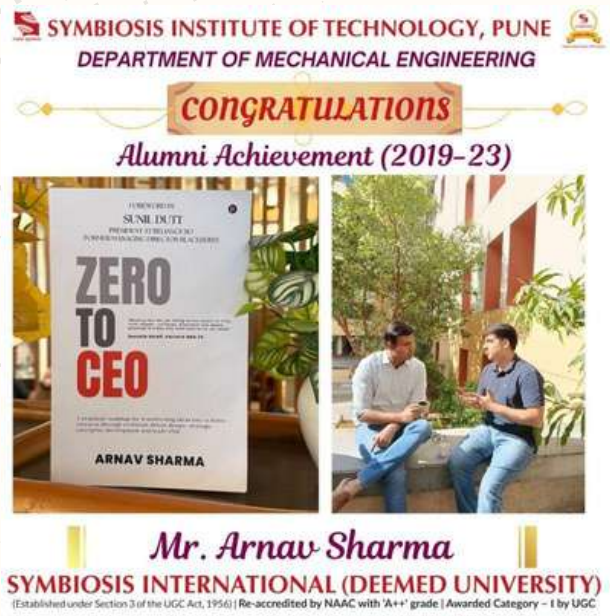

We sincerely acknowledge the Head of the Department of Mechanical Engineering SIT Pune, Dr. Anirban Sur for actively overseeing and strengthening the internship ecosystem of the department, ensuring structured guidance, industry connections, and continuous student support.

Such outcomes are possible when visionary academic leadership and student dedication work together.

Congratulations to the students on this well-deserved success, and best wishes for a transformative learning journey ahead.

Grateful to Aerosys HVAC for supporting young engineering talent and fostering industry–academia collaboration.

Proud Alumni Zero To CEO
On Friday, we had the pleasure of welcoming our alumnus Mr. Arnav Sharma (Batch 2019–23) back to his alma mater, Symbiosis Institute Of Technology Pune, for a warm and meaningful interaction with the faculty.

Over tea and thoughtful conversation, Arnav shared the inspiring journey behind his first published book, “Zero to CEO” a journey marked by discipline, resilience, and the courage to transform ideas into action. His candid reflections on entrepreneurship and the realities of book writing made the interaction deeply engaging and motivating.

What makes this achievement even more commendable is that Arnav has already sold close to 200 copies of his debut book—an exceptional milestone at such an early stage of his professional journey. It speaks volumes about his clarity of thought, consistency, and leadership mindset.

Moments like these highlight the role of an enabling academic ecosystem. Sincere appreciation to the Department of Mechanical Engineering SIT Pune and special acknowledgment to all the faculty and staff for continuously nurturing curiosity, independent thinking, and confidence among students.
To our current students and young professionals, Arnav’s journey sends a powerful message:

- Believe in your ideas
- Embrace the grind behind growth
- And never hesitate to start from zero

Once a student, always a part of the Symbiosis family.

Vikas Gulia

Proud Achievement Announcement!!

We are delighted to share the remarkable Taekwondo achievements of our student, Mr. Om Bhardwaj (Batch 2024–28), from the Department of Mechanical Engineering SIT Pune. His dedication, discipline, and competitive spirit have brought pride to our institute at multiple levels of competition.

Achievements in 2025:

TFI Open State – Gold (2025)

IT District Championship – Gold (2025)

IT State Championship – Silver (2025)

SIU Championship – Gold (2025)

Qualified for AIU Nationals 2025–26.

We are also proud to share that he is now preparing to represent our institute at the G1 Open International Championship scheduled to be held in Pune later this month—an international-level competition that will provide a global platform to showcase his skill and determination.

A few glimpses from his recent victories are attached below.

Congratulations, Om!

The entire department and institute stand with you.

Best wishes for the G1 Open International – make us proud on the global stage!
